

Eden United Brethren Church, Mason, MI

Completion this year of a new \$2MM Family Life Center addition represents the culmination of more than five years of *ministry-driven design* work with the church. We have also worked through a number of code issues together and were flexible with them on scheduling until their finances were in order. This project is part of a master plan and was completed in budget.

A recent fire destroyed their old building. WLP has assisted the church in receiving a fair insurance settlement and has put their replacement worship center on a fast track. Drawing concepts achievable within the insurance coverage were in the church's hands six days after the fire; construction was underway within six months of the fire. The Family Life Center was built with the flexibility to allow the church to stay on campus, while the new worship center was being completed. (summer 2006)
